

70KIT140

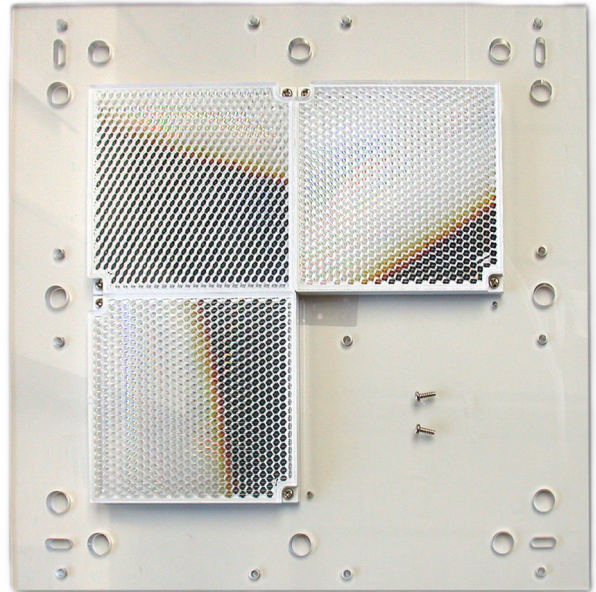

Range extender for FireBeam XTRA/BUE for ranges between 70 to 140 m

General

The 70Kit140 is a range extender for Fire Beam BLUE and Fire Beam XTRA reflective beam detectors. It consists of a clear acrylic plate with 3 extra reflectors attached, and extends the standard beam range from 70 to 140 m. It is required when the beam is used to cover distances between 70 and 140 m.

Installation

During installation the single reflector that is already provided with the fire beam is added into the space provided on the plate using the screws provided. For your convenience the plate is pre-drilled for an optional unistrut wall adapter plate (Adapter).

Details

- Extends the thefirebeam™ beam range from 70 to 140 m
- Pre-drilled to suit the universally popular Unistrut system

70KIT140

Range extender for FireBeam XTRA/BLUE for ranges between 70 to 140 m
