

Intelligent Solar Power Supply System

MODEL: VIGI SP9030

Overview

With an efficient 90W solar panel and a 31.2Ah/10.8V high-capacity battery, this solar panel system delivers constant power to outdoor equipment such as network bridges and cameras. Perfect for areas where network and power deployment is tough, it eradicates wiring hassles and cuts investment costs.

Highlights

High-Efficiency Solar Panel

Improves the conversion efficiency of light with a Grade-A monocrystalline silicon solar panel, ensuring a long lifespan of at least 25 years.

Smart Battery Delivers Optimal Performance

The built-in smart battery supports intelligent auxiliary heating technology, which allows the battery to operate normally across a wide temperature range.

High System Stability, All-Weather Operation

The horizontal mount is made of high-quality SGCC galvanized steel with increased strength, anti-corrosion, and rust resistance. The solar panel is fringed with high-quality aluminum, and 3.2mm tempered glass covers the surface to increase impact resistance.

IP66 Weatherproof

Ensures reliable performance even in harsh environments with rain and dust, reducing subsequent maintenance costs.

Remote Management

Monitor power statistics, get instant intrusion and low-battery alerts, update firmware, and reboot the system via the mobile app. The smart controller conducts real-time self-diagnostics and auto-restarts upon detecting faults, eliminating manual onsite troubleshooting. Enjoy peace of mind, no matter your location.
