

# DC101

Standard gap, surface mount. 4 wires

## DC101-Series

---

The DC101-Series surface mount magnetic contacts are designed for use in installations where a small, sealed unit is required. The reed switch is totally encapsulated in an exclusive polyurethane potting compound preventing moisture from entering the switch and causing false alarms.

## Easy installation

---

The 16 mm standard gap distance allows for fast, easy installation and prevents false alarms from loose fitting doors. Recessed mounting holes make for clean-looking installations.

## High Quality components and materials

---

Reed legs are plated with rhodium or ruthenium, and hermetically sealed in dry nitrogen. This offers superior protection against sticking and provides a moisture free environment therefore preventing corrosion.

## Details

---

- Convenient surface mounting
- Standard 2 m wire length
- Tamper loop provided
- Neat and tidy design

# DC101

Standard gap, surface mount. 4 wires

## Technical specifications

### General

Application type	Surface Mount
Contact type	NC
Connectivity	4 wires, 2 m

### Wired/wireless

Wired-wireless	Wired
Operating gap	15 mm (max.)

### Physical

Physical dimensions	51 x 9 x 9 mm
Colour	White

### Environmental

Mounting surface material	Ferro, Non-ferro
---------------------------	------------------

### Standards & regulation

EN50131 grade	Grade 2
