

**DS-K4DC103**  
**Automatic Door Closer**

It could protect the door frame and door body (steady closing) to ensure accurate and timely closing after the door is opened.

- Latching speed valve adjustable angle range is 0° to 15°.
- Closing speed valve adjustable angle range is 15° to 180°.
- It is recommended that the door closing speed be slightly faster from 180° to 15°, and slow down from 15° to 0°, subject to the door fully closed. To prevent the door from closing too fast and causing the door leaf to collide with the door frame.
